**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	Application No. 09/944,922	Applicant(s) FULLER, JOSEPH B.	
	Examiner Alicia M. Torres	Art Unit 3671	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

In view of the newly discovered reference to Wolffe, Sr. 4,688,376, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee **can not** be applied to the new appeal since applicant(s) have received a decision from the BPAI.

**A Technology Center Director or designee must personally approve the new ground(s) of rejection and reopening prosecution by signing below:**

  
APPROVED BY  
DONALD T. HAJEC  
DIRECTOR, TECHNOLOGY CENTER 3600

#### DETAILED ACTION

##### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Winslow 2,038,697 in view of Moore 4,107,901 and Wolfe, Sr. 4,688,376.

Winslow discloses a device comprising:

- A base (1) including
  - A motor (not shown, see column 1, lines 38-41) attached directly to the base (1)
  - Two unidirectional wheels (3) attached to the front of the base (1)

Art Unit: 3671

- A multidirectional wheel (4) attached to the rear of the base (1)
- A handle (10)
- A universal joint (see Figure 4) comprising
  - two non-parallel axles (13, 15) connecting the handle (10) to the rear of the base (1) above the multi-directional wheel (4)
  - a handle couple (11) attached to the handle (10)
  - a link (12) rotatably attached to the handle couple (11)
  - a bracket (14) rotatably attached to the link (12) and attached to the base (1)
- A recess (see Figure 2).

While Winslow discloses that the connection may be used on a lawn mower, Winslow does not specifically disclose wherein the motor is attached to and rotates a line-cutting element. Winslow fails to disclose a lower grip attached to the handle.

Moore discloses a wheeled lawn mower wherein the electric motor (6) is attached to and rotates a line-cutting element (11).

Wolfe, Sr. discloses a similar apparatus including a lower grip (F) attached to the handle (I).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to include the cutting line of Moore on the lawn mower of Winslow in order to provide a cutting device with simple and lightweight construction.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to include the lower grip as disclosed by Wolfe, Sr. on the device of Winslow since it can be desirable for providing easy manipulation of the assembly.

With respect to the multidirectional wheel (4) of Winslow, it appears the wheel is multidirectional since a user would be forced to drag the wheel (4) across the lawn in order to get from the position shown in Figure 2 to that of Figure 3 if the structure were any otherwise.

### ***Response to Arguments***

3. Claim 3 was originally rejected as being unpatentable over Winslow in view of Moore and Yamada. This rejection was overturned by the Board of Patent Appeals and Interferences with the reason given that the trimmer disclosed by Yamada, having the lower grip, is designed to have its weight fully supported by the operator. It can be seen that the lower-grip limitation added to claim 1 is now rejected with Wolfe, Sr. Wolfe, Sr. discloses a similar trimming apparatus attached to and fully supported by a wheeled cart for lightweight and easy use that is kind to the back of the user.

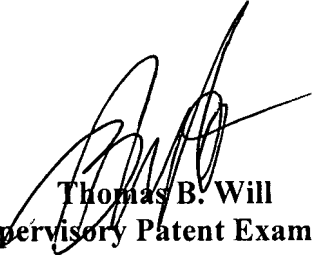

### ***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alicia M. Torres whose telephone number is 571-272-6997. The examiner can normally be reached Monday through Friday from 7:00 a.m. – 4:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thomas B. Will, can be reached at 571-272-6998.
